What is Phonak Serenity Choice?

Phonak Serenity Choice is high-end hearing protection.

What does it do?

Phonak Serenity Choice cancels noise and loud sounds with specific solutions for individual situations. It keeps relevant sound and speech with patented filter technology that allows for natural hearing, situational awareness and communication. In addition, it provides optimum comfort with durable thermoplastic elastomer plugs and filters that allow ventilation of the ear to prevent a build-up of excess moisture.

How many different models are available?

There are six Phonak Serenity Choice models available:

Application	Description
Music	<p>Phonak Serenity Choice Music is composed of high-end hearing protection devices designed to reduce the impact of noise-induced hearing loss. Great for listening or producing music, as none of the original sound is lost.</p> <p>As Class 2 hearing protection devices (SLC₈₀), Phonak Serenity Choice Music KM20 ear plugs provide up to 14 dB of attenuation and can be used to provide safe listening for 8 hours in situations up to 95 dB SPL(A).</p>
Motorsport	<p>Phonak Serenity Choice Motorsport cancels loud noise from motorcycles and sports cars, while keeping relevant sound and speech. 100% acoustically tested filters keep ears ventilated for comfort.</p> <p>As Class 4 hearing protection devices (SLC₈₀), Phonak Serenity Choice Motorsport KI25 ear plugs provide up to 22 dB of attenuation and can be used to provide safe listening for 8 hours in situations up to 105 dB SPL(A).</p>
Sleep	<p>Phonak Serenity Choice Sleep is designed to reduce the sound level of snoring and other unwanted sounds at night while still allowing air to enter the ear. The filters cancel noise and block loud sounds, while keeping ears ventilated for comfort.</p> <p>As Class 4 hearing protection devices (SLC₈₀), Phonak Serenity Choice Sleep KI25 ear plugs provide up to 22 dB of attenuation and can be used to provide safe listening for 8 hours in situations up to 105 dB SPL(A).</p>
Work	<p>Phonak Serenity Choice Work is designed to provide safe listening in work situations and can be used in conjunction with ear muffs for additional attenuation in very loud situations where double protection is a requirement.</p> <p>As Class 4 hearing protection devices (SLC₈₀), Phonak Serenity Choice Motorsport KI25 ear plugs provide up to 22 dB of attenuation and can be used to provide safe listening for 8 hours in situations up to 105 dB SPL(A).</p>

Comfort	Phonak Serenity Choice Comfort is designed to reduce all sounds to an acceptable level. The discreet, noise-reduction ear plug can be worn all day without causing irritation.
Shooting & Hunting	Protect hearing at the shooting range or while hunting with Phonak Serenity Choice Hunting & Shooting. With its patented impulse filter technology, it protects ears from the peak sound pressure level of gun shots, artillery fire and explosions.

What comes in each Serenity Choice box?

The Serenity Choice packaging contains the following items:

- 2 x universal ear plugs in S, M and L size
- 2 x acoustic filters providing the appropriate dB damping
- Aluminium key-ring carrying case
- User guide

How many sizes of earplugs are available?

The thermoplastic elastomer earplugs come in 4 sizes (S, M, L, XL). Three are included in the box (S, M and L) and the XL can be obtained from Blamey Saunders hears on request.

What makes Serenity Choice a smart choice?

- Hearing protection from a brand you know and trust
- Best-in-class noise attenuation and sound quality
- Unique, patented product design, with filters for each occasion
- Thermoplastic elastomer plugs to provide optimum comfort and durability
- Economical pricing to enhance affordability

What is the cost per pair for the Phonak Serenity Choice hearing protection devices?

Application	List Price*
Phonak Serenity Choice Music	\$75.00
Phonak Serenity Choice Motorsport	\$45.00
Phonak Serenity Choice Work	\$45.00
Phonak Serenity Choice Sleep	\$45.00
Phonak Serenity Choice Comfort	\$45.00
Phonak Serenity Choice Shooting & Hunting	\$45.00

*Includes GST

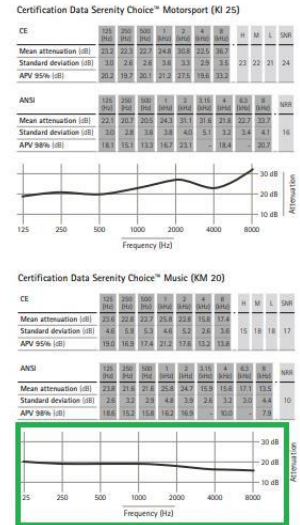

Phonak Serenity Choice™

FAQ

Why is Serenity Choice Music more expensive?

The other products in the Serenity Choice range are more focused on overall noise reduction and the filter design is less focused on preserving high frequency hearing. For musicians, audio engineers and music lovers, a common complaint is that when they wear hearing protection, they lose the higher register of the music, which can impact their appreciation and perception of important parts of the music. Phonak Serenity Choice Music filters are specially designed to provide a much "flatter" frequency response (see image right), which means more of the higher frequency range is preserved and the experience more akin to simply turning the volume down without a muffled or dullness applied to the music. The process of engineering the musician range filters is more nuanced and this is why they are at a higher cost.

Is there a warranty associated with Serenity Choice?

Yes, all Serenity Choice models come with a two year warranty. We advise keeping your invoice as proof of purchase as these products are not serialised items.

Ordering

How do I order Phonak Serenity Choice?

All available devices can be ordered online via the [Blamey Saunders store](#). Alternatively, you can [email us](#) your order requirements or call us on **1300 443 279**.
